Claims 20-43 have been cancelled. Claims 1-19 are currently pending and are under examination.

Benefit of priority is to October 16, 2003.

Claims 6 and 14 are objected to because of the following informalities: In Claims 6 and 14, reference is made to "anti-tumor necrosis factor alpha" and not to "anti-tumor necrosis factor alpha antibody".

Appropriate correction is required.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-19 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The specification refers to deposited biological materials under the Budapest Treaty, but the statements therein do not comply with the Treaty. In order for one of ordinary skill in the art to determine if these Claims are being infringed, it is essential that this deposited cell line be available. It is noted that Applicants have deposited the cell line but there is no indication in the specification that the cell lines are available to

Art Unit: 1656

the public. If the deposit was made under the terms of the Budapest Treaty, an affidavit or declaration by Applicants, or a statement by an attorney of record over his or her signature and registration number, stating that the cell line will be irrevocably and without restriction or condition released to the public upon the issuance of the patent, would satisfy the deposit requirement made herein.

No Claims are allowed.
